(HAYS)

LEWIS FIELD
SATURDAY AFTERNOON, OCTOBER 6, 1928
2:00 O'CLOCK

Wichita U. vs. Hays Tigers, Saturday, November 3, at 2:00 o'clock

W. D. "Bill" WEIDLEIN
DIRECTOR OF ATHLETICS

HAROLD SCHMIDT
ASSISTANT COACH

Bill Weidlein, head football coach, is considered to be the busiest man on the Hays campus. He coaches football, is athletic director and has charge of the men's physical education department. Bill is a product of the Jayhawk, where he is upheld as one of the best athletes of all time. He made three K's in football and was selected as captain of the AM-Missouri Valley team.

HAROLD SCHMIDT, Assistant Coach

Harold Schmidt, former basketball and football star at the University of Kansas, is assistant football coach to head coach W. D. Weidlein. Coach Schmidt is in charge of the backfield. A former halfback himself, Schmidt has been drilling fundamental tactics into the Tiger ball luggers this fall. Schmidt is also head basketball coach at Hays, a position he has held since the first of the year.

MACKS for Delicious Food

WE MAKE OUR OWN PIES, CAKES, Etc.

PORTABLE TYPEWRITERS ALSO SOLD AT MACKS

BYRON ROGERS, Captain

Byron Rogers, a senior and two-letter Tiger football man, returned to K. S. T. C. this fall after a year's absence. He was appointed captain by Coach W. D. Weidlein, the first Tiger gridster to be so honored under the "appointive method" adopted here this year. The captaincy is an appointive position under the coach, making it as much of a position to be achieved as a place on the team itself. Rogers will be found at guard or center with his 165 pounds of snappy Tiger fighting spirit.

PRESIDENT W. A. LEWIS

No one enjoys a good, hard, clean game more than President Lewis, and unless it is impossible he never misses a game. Our present athletic field was named after him as a tribute and honor to the fine support and interest he has always had in athletics at K. S. T. C.

READING ROOM—FORSYTH LIBRARY, K. S. T. C., HAYS

PRINCIPAL CHANGES IN THE RULES FOR 1928

The rules governing incompleated backward passes have been so modified that only those passes which have been clearly thrown a distance of approximately two (2) yards through the air before striking the ground, are not dead at the point of recovery. Such passes are defined in Rule VI as protected backward passes, and Rule XVII, Section 1 (b), has been altered to indicate the rights of all players when a "protected" backward pass strikes the ground before being caught.

Rule XVIII, Section 5, has been amended so that it is no longer necessary to draw any distinction between a muffed punt and a fumble. After a ball has been kicked beyond the line of scrimmage it is to be considered a "kicked" ball until it is declared dead by the Referee.

The traditional rules governing "on-side" and "off-side" still obtain, except that if such a kicked ball is legally recorded by a player of the kicker's side, he may not advance it beyond the point of recovery.

In Rule XVI, Section 3 (a), the words "after the pass has been made" have been stricken out, so that on forward pass plays there can be no interference whatsoever by players of the passer's side who have crossed the line of scrimmage.

In addition to these changes, the wording of several of the rules has been modified in order to bring out more clearly the intent of the Rules without in any way changing their meaning.

NEW SCIENCE HALL NEARS COMPLETION: MAY BE IN USE ABOUT DECEMBER 1

Reports from the business office of K. S. T. C. are that the new \$150,000 science hall will be completed about December 1, and it is most probably that the building will be moved into immediately, however, in case any portion of the finishing work is delayed, the moving will not take place until during the Christmas vacation.

The 1927 legislature appropriated \$150,000 to provide for a structure to house the various sciences departments of the college. Grounds were broken Feb. 1, 1928, and work began at once and today the building is nearing completion.

Gurtler Construction Company of Topeka has the general contract for the new building at a total sum of \$116,104. Separate contract for the heating, plumbing and electrical equipment is owned by the Salina Plumbing Company. This contract was awarded for \$10,641.

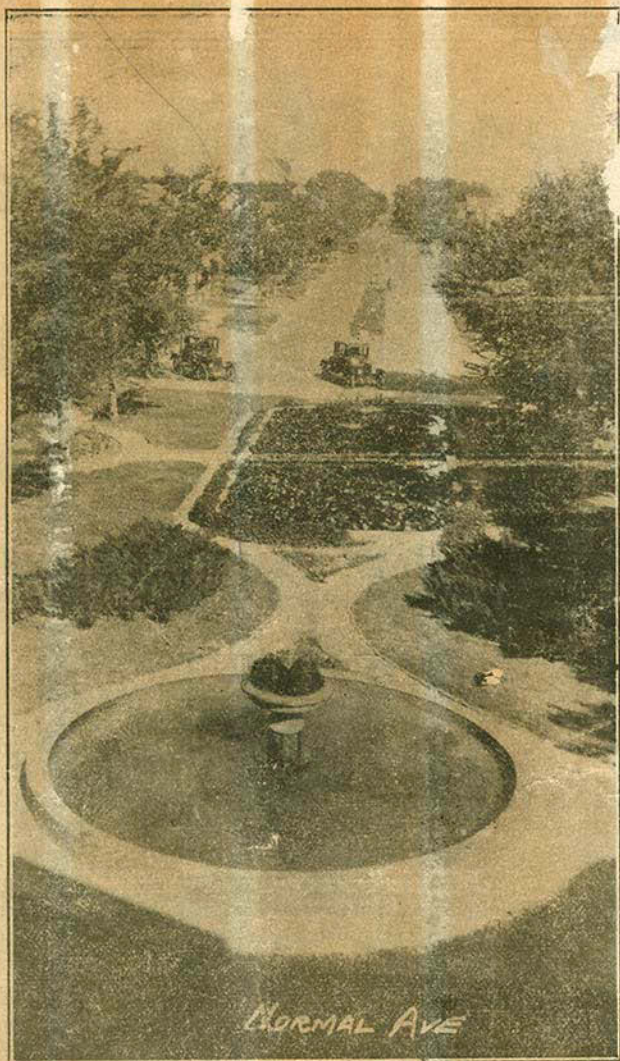

Charles D. Cuthbert, state architect, designed the building, making plans for the building to comply with

the rest of the buildings on the campus, following gothic style. The Science Hall is constructed of native lime stone and Bedford stone. A red tile roof has been added which makes the building most pleasing to the eye.

The school furnished 265,000 bricks for partition wall construction in the building besides supplying the sand and limestone from the college pits.

Some features of the building include the type of floor covering and the acoustically perfect walls of the lecture rooms. The floor will be covered with battleship linoleum except the entrance and the steps.

Four departments will be housed in the science hall. Chemistry and physics will be on the first floor; biology on the second floor; and agriculture on the third and fourth floors. In addition the copper covered dome surmounting the tower over the main entrance will provide an astronomical laboratory, with room for a large telescope. A sun dial is also a new feature in the building.
